

Youcubed Data Talk Mindset and Learning

What do you notice?
What do you wonder?

What is going on in this data visualization?

In a randomized controlled trial (RCT), “treatment” students took the mindset course at the start of the year, “control” students did not. The 2 groups were taught by the same teachers and were statistically indistinguishable from one another before the online course (n=1090)

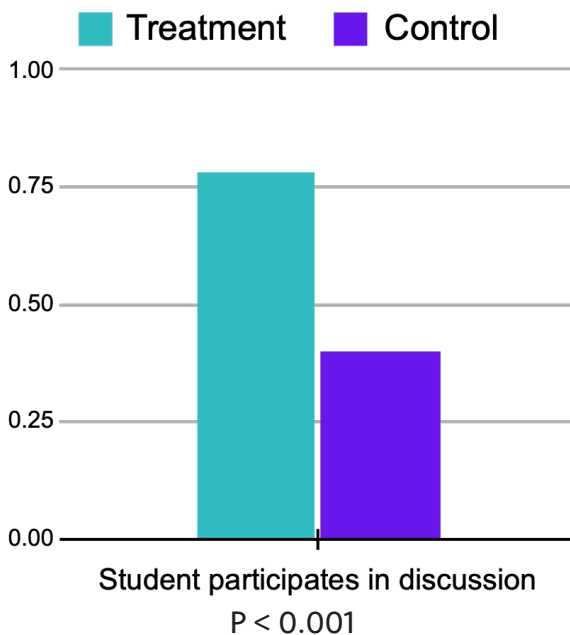

What happens when you
change students' mindsets?

63%

The average student in the
treatment group scored
higher, on SBAC tests, than
63% of the control group.

Student participates in class
discussions

Student gives up quickly
